-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Young et al. (U.S. Patent 5031489).

Young et al. disclose a fastener insertion device to insert a fastener into a workpiece, comprising: a supply of fasteners (10); a tube (32) defining an opening that is larger than the fastener (F); and an air flow generator to create air flow through the tube and toward the workpiece, and the tube defines openings about a circumferential surface of the tube to prevent the fastener from inhibiting the air flow when the fastener is placed in said tube (Figs 1-3 ; col.3, line 1 - col.4, line 2).

It has been held that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations. *Ex parte Masham, 2 USPQ 2d 1647 (1987)*.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3726

4. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Young et al. (U.S. Patent 50314890) in view of Applicant's admitted prior art (AAPA) .

Young et al. teach the limitation except the air flow generator generates laminar air flow.

But Applicant's admitted prior art AAPA as found on page 17, lines 6-8 of the specification, discloses the air flow generator generates laminar air flow.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to utilize the air flow generator of AAPA on the device of Young et al. so as to generate laminar air flow.
